PUTTY KNIFE

Super Prof, putty knife made out of one piece of high quality stainless steel, which is equipped with a stainless steel and soft coat handle.

A putty knife is used for smoothing out smaller holes in walls and for filling irregularities in wooden objects by applying filler or other leveling compound as preparation for painting.

The new, strong Super Prof putty knives are made of high quality stainless steel and ideal for the plasterer, dry builder, painter and other craftsmen.

JOINT KNIFE

Super Prof, joint knife made out of one piece of high quality stainless steel, which is equipped with a stainless steel and soft coat handle.

A joint knife is used to close the joints between plaster and wood plates. Due to the wide blade, the joint knife is suitable for closing larger cracks or for filling large holes in the stucco.

The new, strong Super Prof joint knives are made of high quality stainless steel and ideal for the plasterer, dry builder and other craftsmen.
